NETWORKING & SECURITY - LAB CODE OF CONDUCT

No Eating or Drinking: To maintain a clean and safe environment, eating and drinking are strictly prohibited in the Labs.

Respect for Others: Please maintain a respectful and collaborative atmosphere while you are working in the Lab. Any student causing disruptive behavior in class will be reported to Seneca Student Conduct.

No Children: As per Seneca policy, students are not allowed to bring their children and parents to the Labs until we have accommodation provided for the specific student.

Security Measures: The professor or lab technician must be present during Open Lab times. If any student is found using the Lab without the professor or lab technician present, disciplinary action will be taken.

Open Lab Sessions: To monitor Open Lab timings, students need to scan the QR code. Open Lab sessions operate on a first-come, first-served basis, with a limit of 36 students per session.

Attendance: When attending an Open Lab session, students are required to complete the Open Lab Form.

No Personal Devices: Personal devices are not allowed. Students must use the lab PCs only. Connecting personal devices to the lab network is prohibited.

Equipment Handling:

1. Mishandling or tampering with the equipment can result in disciplinary action.
2. Reset all devices to default settings when you finish the lab (use the K1001 and K1270 instruction manual).
3. Clean up the cables and turn off the devices after you finish your lab. You will not be allowed to attend the next Open Lab session if you fail to do this.

Issues with Equipment: Please report any issues with the equipment to the lab technician or professor.
