

S VEHICLE SAFETY

1 DID YOU KNOW?

Amidst a significant increase in vehicle thefts as of 2022, and available technology to counteract built-in security measures, it is important to know that mitigation starts with ensuring you adopt a "Swiss-cheese" model for prevention.

This means you should consider having multiple points of prevention as a fail-safe to keep your vehicle safe.

2 YOU CAN PREVENT THIS!

You can prevent criminal opportunities by doing some of the following:

- Keep your vehicle doors locked and your windows secured.
- Do not leave your car running while away, even if it is secured.
- Avoid posting or buying vehicle-identifying memorabilia.
- Have your keys ready as you approach your vehicle.
- Do not leave valuables, unattended persons, or animals visible in your vehicle.
- Avoid saving your address on your on-board navigation system.
- Consider your surroundings (lighting, escape routes) when parking your vehicle
- Check your vehicle for any signs of tampering.

3 NOW WHAT?

If you suspect you have been a victim of a crime related to your vehicle, ensure you document all your findings and report your concern to your local police department. If an incident occurs on-site, please report it to security.

Invest in multiple theft-prevention systems such as an ODB-Port Blocker, RFID Blocker, Steering Wheel Locks, or professionally installed tracking technology.
