Tic-Tac-Toe: AI vs. Humans

Project Description:

This project updates the classic game with real-time action and Artificial Intelligence (AI) integration. Players physically interact with the game and IoT connectivity elevates the gameplay further. AI's role in gaming is addressed, offering insights into the capabilities and limitations for human and AI interactions.

Student Team:

Omid Pakroh Rezaeieh

Ammar Yunus Kapasi

Supervisor:

Mrs. Karen Craigs
