

# Smart Health Monitor for Eldercare

## **Project Description:**

This project is an IoT-based patient health monitoring system designed to keep track of important health measurements in real time. The interface is simple with easy-to-use controls. The device is portable and lightweight, scalable and flexible, and runs on low voltage for energy efficiency.

## **Student Team:**

**Inderjot Singh**  
**Simon Girgis**

## **Supervisor:**

**Mrs. Karen Craigs**
