Session #1a | Rapid Fire Research

This session will showcase four different applied research projects that were completed in the last year. Student research assistants will present the industry challenges, solutions and outcomes.

Session #1b | HELIX Venture Pitch Event

Five HELIX entrepreneurs will pitch their venture to a panel of judges. Learn how the next generation is preparing to impact the future.

Session #2a | Collaboration for Social Innovation

Representatives from industry, academia and not-for-profit organizations speak about how collaboration between different sectors can accelerate innovation and lead to societal benefits in this panel discussion.

Session #2b | Collaboration practices impacting new venture development

One of the reasons the Seneca HELIX incubator is successful is because it cultivates strong, collaborative partnerships. These foster more programming and opportunities to nurture and develop startup ventures, which in turn help grow the entrepreneurial community. This discussion highlights the dynamic relationship between HELIX, internal and external stakeholders.
