

Seneca partners with Google Cloud to pilot Interactive Tutor

Published 3/23/2023 by [Stephanie Conte](#)

Meet your new tutor. Ready to learn whenever you are. Day or night.

Thanks to a new partnership with Google Cloud, students in select courses within Seneca Business will take part in a pilot program that offers them a personalized, A.I.-powered tutor as a companion resource to what they learn in the classroom.

This Interactive Google Tutor is powered by Google's A.I. and machine learning capabilities. It analyzes digital course content and creates interactive, tailored resources to help students understand course concepts and test their knowledge — while continually adapting to their comfort levels and growing expertise.
