

SEMET students visited industrial partner – Atlas Transformer

Published 3/28/2023 by [Katherine Apostolou](#)

[School of Electronics and Mechanical Engineering Technology](#) students had the opportunity to visit a leading transformer manufacturer and Seneca industrial partner – Atlas Transformer, for a glimpse of innovative ways to improve quality and efficiency in transformer manufacturing.

Led by [Rakesh Kantaria](#), the students got to visit different stations at every step of the manufacturing line, giving them a thorough understanding and appreciation for the complexity of the operation.

Students were inquisitive and asked lots of questions. It was a fun and informative day that ultimately helped prepare students for the real world.
