Get ahead with AI

Published 10/30/2023 by Stephanie Conte

Take your studies to new heights in 2024 with Seneca Polytechnic's cutting-edge Artificial Intelligence graduate certificate program. This eight-month program will equip you with hands-on skills and knowledge to build a dynamic and successful career in this growing industry.

You'll learn how to use data visualization, cloud technology and machine learning algorithms to provide valuable insights and solutions. You'll explore innovative applications, build AI models and discover how to use technology to address urgent issues. In addition, there is an optional work term to give you even more opportunities to apply what you've learned in a professional setting.

The program kicks off in January 2024. If you'd like to learn how AI can give you a competitive edge, register for a one-hour webinar on Tuesday, Nov. 14 at 6 p.m. EST.
