---

Three steps to make a QR code for your online resumé using Google Docs:

1. Create your resumé online and make it accessible using Google Docs  
<https://docs.google.com>.
2. Create a QR code that links to your online resumé. QR codes can be generated through Adobe, which Seneca Polytechnic students have access to through their Adobe account: [new.express.adobe.com/tools/generate-qr-code](https://new.express.adobe.com/tools/generate-qr-code).
3. Make sure you can access your QR code from your mobile telephone or tablet device for employers to scan.
