GitHub Repo Relocation

For current Seneca GitHub users who have their IDE set up for existing code, it simply involves reconfiguring the IDE to target the new location

- Please follow instructions below: • Using Visual Studio Code • Using Github Desktop
 - Using Gib Bash Shell

Using Visual Studio Code

1. Open Visual Studio Code. Click on "Terminal" and start a new terminal.

>	File Edit	Selection	View	Go	Run		$\leftarrow \rightarrow$			$^{igodoldolde{}}$ Workspace
ብ	EXPLOR					Terminal			New Terminal	Ctrl+Shift+`
L Cr	\sim open e	DITORS				Help				
ρ	× 刘	Welcome							Run Task	Shift+Alt+F10
	✓ WORKS	PACE							Run Build Task	Ctrl+F9
62							Start		Run Active File	
							L New		Run Selected Text	
æ^							۲) Oper	,		
₽₽							P7 Oper			
							Le Clone			
Ē							S Conn		Configure Tasks	Ctrl+Shift+Alt+S
									Configure Default Build	Task
							Recent			

2. In the Terminal, run the git command "git remote -v" to see where is the origin configuration.

PS C:\Users	\GitHub\PowershellScripts> git remote -v
origin https://github.	/Powershell-Scripts.git (fetch)
origin https://github.	/Powershell-Scripts.git (push)
• PS C:\Users\	\Documents\GitHub\PowershellScripts>

3. If it needs to point to the new GHEC, then find the origin URL and run command "git remote set-url origin https://github.com/(insert new origin repo here)" below

PROBLEMS		TERMINAL			PowerShell Extension
● PS C:\Use ○ PS C:\Use	ers\ ers\	\Docume	ents\Git ents\Git	Hub\PowershellScripts> git remote set-url origin https://github.com/provershell-Scripts.git Hub\PowershellScripts>	

4. Additionally check to ensure the login credentials in Visual Studio Code is also updated for extensions. If still using the github.senecapolytechnic.ca userid, Sign Out, and Sign in again to the https://github.com/Seneca-Polytechnic

Back to top

Using GitHub Desktop

1. Go to Repository->Repository Settings and change the URL

2. Enter the new repository location, and click SAVE.

Repository settings		
Remote	Primary remote repository (origin)	
lgnored files	https://github.com/	.git
-O- Git config		
	Save	Câncel

https://github.com/S	Seneca-Polytechnid	
	Continue	Cancel
()nen the renost	tory page on (sitHub	In your browser

Back to top

Using Git Bash Shell

- 1. Run "git remote -v" to check the current remote origin.
- 2. If necessary to point to a new location, run "git remote set-url origin" and the URL of the new location.

	♦♦ MINGW64:/c/users/		-	O	×
	steve@HomeOffice_MINGW64	(master)			
	origin https://github.com/page/accelence/page/pc-Java-OpenCMS-Akamai-PurgeCache.git (fetch) origin https://github.com/page/accelence/page/pc-Java-OpenCMS-Akamai-PurgeCache.git (push)				
I	stauselleneoffice_HTMCW61/DC-Java-OpenCMS-Akamai-PurgeCache § git remote set-url origin https://github.com//DC-Java-OpenCMS-Akamai-PurgeCache.git
