

Better Prompts, Better Results

Version 75

Published 6/1/2024 by [Charmaine Williams](#) Last updated 4/24/2025 6:51 PM by [Kristel Campitelli](#)

Effective prompting is essential for maximizing productivity and efficiency. Well-crafted prompts help you communicate clearly with AI tools like Copilot, ensuring accurate and useful responses. Our quick videos and resources will help you learn how to create precise prompts, enhancing your ability to generate content, solve problems, and streamline tasks.

Please note: Some resources may mention integration with Microsoft 365 apps, documents, and conversations, which requires a license not currently available at Seneca. Seneca students and employees have access to Microsoft Copilot with enterprise data protection through the [Microsoft 365 app](#) or at microsoft365.com/copilot.
