

Privacy and Security

Version 9

Published 6/1/2024 by [Charmaine Williams](#) Last updated 11/8/2024 5:05 PM by [Charmaine Williams](#)

When logged into Copilot using your Seneca ID, your prompts and responses remain private and are not accessible to Microsoft or used for AI training.

Look for the 'Protected' badge - it indicates that you are in Protected Mode. This feature allows you to chat with Copilot in a safer and more private secure environment.

Here's what it means:

1. **Privacy Assurance:** When Protected Mode is enabled, your chats and data are not stored or shared with anyone, including Microsoft. **Copilot won't remember your previous chats, and it won't use them to improve responses.**
2. **No Data Retention:** Your conversations remain confidential, and Copilot won't retain any information from your chats. This ensures that your privacy is respected.
3. **Safer Interaction:** The green badge signifies that you're interacting with Copilot in a secure environment. No personal data is collected or analyzed during your session.

If you have any questions or concerns, please do not hesitate to reach us at copilot@senecapolytechnic.ca, but before you do, give Copilot a try first for instant answers!
