Overview of ECE/ECYA field placement seminars

Field Placement Seminars are classes evaluated concurrently with the Field Placement experience. These seminars cover various relevant topics designed to support students during their placements. These seminars provide an excellent opportunity to discuss any issues or ethical dilemmas that arise during placements. If students encounter problems at their placements, the seminar class offers a chance to review and receive valuable feedback from staff and peers, enriching the learning experience for everyone. Students gain valuable insights from sharing their placement experiences with each other, while maintaining the essential confidentiality required for the seminar process.

Field Placement Seminars are listed on student timetables and are held in-person at Seneca.
