

Use Gartner for your technology & business research needs

Published 9/11/2024 by [Sheila Murithi](#)

For those interested in learning more about the latest technology and business trends, [Gartner](#) is a free research tool for students and employees.

Gartner research is used by many institutions, as well as Fortune 1000 and Global 500 companies, to help translate complex technology-related issues into comprehensive advice, meaningful analysis and stronger performance. Gartner offers the combined brainpower of 2,500+ research experts and consultants who advise executives in 100+ countries daily. Gartner publishes thousands of pages of original research annually. Gartner can help you make smarter and faster decisions. You'll find relevant insights, advice and tools in the Gartner research collection, whether you're an IT professional, student, faculty member, or employee.

Why Should I Use Gartner?

Gartner gives you access to research from 2,500+ research analysts and consultants from 80+ countries.

Features include:

- Research and reports: Enhance your research with access to Gartner Special Reports for time-sensitive research on key issues.
- Personal library: Build your library of Gartner reports from the myGartner dashboard.
- Webinars: Attend various webinars and online events to learn about the latest digital trends.

How do I access Gartner? Log in to [Gartner](#) with your Seneca email address and password. For an overview of how to use Gartner, watch this [video demo](#).
