

Shining a spotlight on research

Published a day ago by [Sharon Lindores](#)

Did you know [Applied Research](#) hires student assistants?

Every year a number of students get the opportunity to do cutting-edge research on everything from artificial intelligence to life sciences with expert faculty and industry partners. Together, they work on projects that address real-world challenges.

If you want to see some of the work going on at Seneca, check out the virtual [Applied Research Project Showcase](#). It features brief descriptions and posters from projects completed in 2023-24. You can vote for your favourite poster online by Sunday, Oct. 20 at 4 p.m. The most popular one will win the People's Choice award.

Research assistants are hired throughout the year, so if you're interested in upcoming opportunities, keep your eye on the job postings on [Seneca Works](#).
