

How can Seneca's Sandbox better serve you?

Published 11/21/2024 by [Megan DeLaire](#)

Seneca Polytechnic's digital media hub is ready for an upgrade, and the team behind it wants to know what changes you think could make it even better.

The **Sandbox** is a one-stop-shop for access to audiovisual equipment, 3D printers, studio space and digital assets like stock photos, video and audio. Its purpose is to support a range of multimedia projects and help Seneca students, faculty and employees across multiple campuses expand their digital media creation skills.

The Sandbox's services, spaces and equipment are currently under review to make sure it is kept up to date.

As part of this review, the Seneca community is invited to complete a needs assessment survey to help determine how the Sandbox can better serve you.

[Take the survey to share your input.](#)
