

# Waterproofing repairs for buildings B and D at Newnham Campus to start July 26

Published 5 days ago by [Ran Luo](#)

Please be advised that waterproofing and foundation repairs for sections of buildings B and D at Newnham Campus will start simultaneously on Saturday, July 26, followed by concrete repairs for the loading dock that's located near the exterior entrance to Building D. The repairs are expected to be completed by Sunday, Aug. 31.

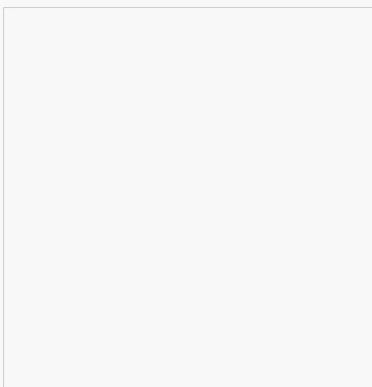

## Expected impact on you

As removals and excavations will be part of the waterproofing and foundation repairs, you can expect fencing and signage to be placed around the impacted areas for your safety.

You can also expect:

- Having regular access to all entrances, doors and emergency exits/push buttons
- Temporary relocation of our beloved hot dog stand
- Having limited access to the loading dock area during the concrete repairs

For your convenience, we have included a campus map that highlights the impacted areas in two red circles, with the temporary location of the hot dog stand represented by a red star:

Thank you for your patience and understanding.
