

Colour and Fashion Trends

Version 5

Published 8/6/2025 by [Holly Werda](#) Last updated 3/2/2026 8:19 PM by [Courtney Hernandez](#)

The objective of this subject is to develop creative approaches to design issues by developing a student's individual skill and imagination. Through a series of exercises and projects, each student will explore colour theory, fashion forecasting, and the psychology of colour to create successful design compositions. The design abilities and skills acquired in this subject provide both a theoretical knowledge of the colour wheel, and an applied method for the use of colour within a design context.

College Course (Ministry Code)	FST110 NDC (JFG4T)
Start/End Dates	April 27, 2026 to June 16, 2026
