

Forensic Crime Scene Investigation - Sections 1 & 2

Version 1

Published 11/6/2025 by [Holly Werda](#) Last updated 11/6/2025 6:14 PM by [Holly Werda](#)

This course introduces students to the concept of forensic science with a focus on gathering information to generate evidence to be used in the court of law. Students will gain knowledge into the various technical and scientific methods currently used for identification purposes. Areas that will be covered include pathology, toxicology and fingerprints.
