

# Seneca TechSparks: Applied Technology Design Showcase - Winter 2026

Published yesterday by [Fabio Pricinato Costa](#)

Following in the footsteps of our previous Capstone events, this April showcase will include 20+ student projects representing three electronics programs from **SITAS** (EEN, ECT, EET) and one from **SECET** (EMA). You'll see innovative and interactive technologies on display and interact with the students who designed and created their working prototypes. We are expecting a variety of industries to attend, with special guests from OACETT and their Toronto Central Chapter.

Enjoy discovering what our computer, electromechanical, and electronics engineering technology students have been working on these past 3 months -- designing, building, and programming -- as they complete their final semester at #SenecaPolytechnic.

The voting platform will be shared with eligible attendees at the start of the event if you sign up below. (Students and their families are not eligible to vote.)

What: **Seneca TechSparks: Applied Technology Design Showcase, Winter 2026 edition**

When: **Tuesday April 14, 2026**

Time: **4:00PM to 6:30PM**

Location: Seneca Polytechnic, Newnham Campus

Room: **A1531A&B, The Great Hall**

Seneca TechSparks Awards Ceremony to start at 6:15PM.
