Please follow these steps **before** your testing appointment:

- To test, you will need a computer (desktop or laptop, not a Chromebook, iPad, cellphone or tablet) with a reliable Internet connection, webcam and audio capabilities. If a proctor is unable to clearly view you, your test environment, workspace and identification, you will not be permitted to write a test.
- download and install Zoom Desktop Application and familiarize yourself with joining a meeting

This video outlines How to download Zoom

- For information on how to meet Examity's technical requirements, view Examity's Live Proctoring Test-taker Guide
