

Seneca researchers teach machines to help video editors

Published 4/19/2022 by [Tiffany Hsieh](#)

Ask anyone who's done it — video editing is time-consuming, tedious work. And with demand for new content across countless platforms higher than ever, the editor's work is never done.

But thanks to [Seneca Innovation's](#) artificial intelligence (AI) video categorization project with industry partner, [Vubble](#), human editors will now have some high-tech help.
