

Fish

Version 2

Published 10/14/2022 by [Stephanie Conte](#) Last updated 10/26/2022 6:21 PM by [Stephanie Conte](#)

The fish teaches us how to think critically about our perception of the world and the way things work. When we follow in the example of the fish, we learn to imagine the world of tomorrow and how to question our perspective. Fish is a philosopher and dreams of the world beyond.

We chose to depict the fish alongside sciences, aviation and environmental studies. We felt these types of programs require a student to look at the world through a philosophical lens in order to create dynamic and creative solutions.

School of Aviation

- Aviation Operations diploma program
- Aviation Safety advanced diploma program
- Honours Bachelor of Aviation Technology

School of Biological Sciences & Applied Chemistry

- Biotechnology – Advanced diploma program
- Cannabis Regulation & Quality Assurance advanced diploma program
- Chemical Laboratory Technician diploma program
- Chemical Laboratory Technology – Pharmaceutical advanced diploma program
- Clinical Research graduate certificate program
- Cosmetic Science graduate certificate program
- Pharmaceutical Regulatory Affairs & Quality Operations graduate certificate program

School of Recreation & Environmental Studies

- Environmental Landscape Management diploma program

School of Environmental & Civil Engineering Technology

- Environmental Technician diploma program
- Environmental Technology advanced diploma program
- Environmental Technology (For Applicants Currently Attending York University) advanced diploma program
