Our goal is to shape the digital world and innovate for tomorrow:

Whether you pursue a career in computer programming, software development or a related field, the academic programs in the School of Software Design & Data Science will help you thrive in roles that are central to every organization. The school's expert faculty, industry partnerships and cutting-edge labs will provide you with opportunities to create game-changing innovations that fuel digital futures.

Our programs lead to dynamic and challenging professions with countless rewards and many opportunities in Canada, the United States and abroad. They offer highly competitive salaries, flexible full-time or part-time, contract and consultant work schedules and a variety of career possibilities.

Our Program Benefits:

- Faculty with industry expertise
- Modern and continually evolving curriculum
- Accredited programs
- Program transfer opportunities, including diploma-to-degree
- Modern well-equipped facilities
- Paid co-op work placements in most programs
- Excellent reputation with employers
- High graduate placement rates
