In the early 1990s, as AIDS tightens its grip on major cities around the world, the relative safety of Montreal's nightlife becomes a magnet for gay men. But when they start turning up dead the queer community has more to fear than the disease. While the city's police force dithers over the presence of a serial killer, a group of queer activists starts making connections, and rises up to start a movement that would end up changing thousands of lives.
