

Team effort creates simulation lab benefitting students across disciplines

Published 11/24/2022 by [Stephanie Conte](#)

It takes a village to prepare career-ready graduates with the skills and experiences to be successful.

At Seneca, this includes cross-disciplinary experts coming together to provide students learning environments that replicate what they will encounter on the job.

A recent example is the Simulation Apartment Lab at King Campus, where [Honours Bachelor of Behavioural Psychology](#) (BBP) students participate in simulations that replicate interactions with real clients as part of the Adulthood and Aging course.
