

Seneca's Digital Health Hackathon leads to scalable business solution

Published 1/12/2023 by [Stephanie Conte](#)

Kaveh Eshraghian, Coder; Mark Buchner, Principal Investigator and Professor, School of Information Technology Administration & Security; Wing Yan Chan, Project Manager; and Efat Gorji, Master Programmer, (left to right) discuss the research project.

Lorinda Lee, Chief Human Resources Officer at Oak Valley Health, wanted a smart search engine to help her team answer the many employee queries they receive.

Thanks to a recent applied research project with [Seneca Innovation](#) and Trinetra Systems Inc., an AI-powered HR data management prototype has been developed that, once live, will help large organizations like Oak Valley Health field inquiries more effectively.
